Sprint Planning

Sprint

Should answer What, How, Why

Sprint Retrospective

Sprint Review

Inspect how we work as a team, find experiments to try improve ways of working

Daily Scrum

Inspect the Product Increment and adapt Product Backlog to maximize value of future Sprint(s)

Product Backlog Refinement

A container for all the other events, providing a planning and focus boundary.

Order, slice, learn about Product Backlog Items until they are Ready to be pulled into a Sprint.

Inspect progress towards the Sprint Goal, and adapt our plan for the next 24 hours

The Dev Team commits to the scope of the Sprint.

One timebox is false, one description is incorrect. One event is not mandatory.
